

MARKETWAROS.COM

Your marketing spends. It never stops.

39 AI agents that write the offer, run the campaigns, and kill the ones losing your money. Start by auditing your own website free — 31 checks, no account, no card.

Every number in this deck is on the website. Check it before you believe it.

START HERE

Name the advert that brought you your last customer.

Most owners cannot. Not because they are careless — because nothing they pay for was ever built to tell them.

THE TUESDAY YOU HAVE HAD

You know this week

You boosted a post. It got four thousand views and no phone calls. You do not know which four thousand.

An agency sends a report on the 5th. It is beautiful. Nothing in it says stop.

A customer who bought from you twice last year has not been back since March. Nobody noticed.

None of that is a marketing problem. It is a nobody-is-watching problem.

THE DIFFERENCE

It says no.

Every other tool only says what happened.

A dashboard shows you £400 went out and two enquiries came back. It shows you that again next month. Ours refuses to run the advert that cannot be measured, and stops the one that is losing.

WHAT IT REFUSES

Five things it will not do, whatever you tell it

Spend where it cannot measure

No conversion tracking, no paid boost. Spending blind is not a service you should be sold.

Hand you somebody else's email

Every address is checked against the business it belongs to. Directory inboxes are binned, not added to your list.

Post the same thing twice

When a publish response is lost, it asks the channel what happened instead of guessing and posting again.

Invent anything

No made-up contacts. No filler statistics. When it cannot find something, it tells you it could not.

Keep going when you say stop

One control halts every campaign, every scheduled send and every pound, instantly.

NO SALES CALL. NO CARD.

Audit your own website in four minutes

1

Type your address

It crawls your real pages and runs 31 checks, exactly as a search engine would.

marketwaros.com/audit

2

Read your three worst problems

In full. Free. With what each one is costing you and how to fix it. Not a score with a salesperson attached.

3

Judge us on it

If it is wrong, you have lost four minutes and learned not to trust the rest. That is exactly why we lead with it.

THEN IT GOES TO WORK

39 agents. 12 tools. 9 of them running before you connect a thing.

Finds the customers

Give it a list of business names. It finds their websites, their published addresses and their numbers — and never invents one.

Writes what you send

Offers, emails, adverts, landing pages. In your voice and your customer's language, not a template with your name dropped in.

Runs the campaigns

Email, social and paid, briefed, made, published and followed up from one place, on one bill.

Guards the money

Cost per lead and per order against your own numbers. Every refusal is calculated, never guessed.

WHATEVER SIZE YOU ARE

One engine. Three very different jobs.

On your own

A trade, a shop, one practice

No marketing hours, no agency. It writes, sends and chases — and tells you which of your own customers are about to leave while there is still time.

Starts at £0. The audit, the vault and the offer builder need no card at all.

Growing

A team, a few thousand customers

Campaigns running, no idea which pay. It scores every one against your own median, kills the losers and moves the budget to what works.

Growth: £49 a month, 3 brands, 5 people.

Several brands

A group, a franchise, an agency

Each brand keeps its own voice, its own sending domain, its own audience. One account, one bill, and no brand's list ever touches another's.

Separated in the database, not by a filter on a screen.

THE OBVIOUS QUESTION

You have never heard of us

That is true, and we are not going to paper over it with a wall of logos or a five-star quote we wrote ourselves.

So here is the deal instead. Run the free audit on your own website before you speak to anybody here. It costs nothing, needs no account, and it runs the same checks the paid product runs.

If it finds something you did not know, that is your answer. If it does not, you have lost four minutes and you owe us nothing.

We would rather be checked than believed.

PRICING

No setup fee. No contract. No sales call.

Free

£0 for ever

1 brand · 1 user · 0 credits a month

The audit, the customer vault and the offer builder. Enough to judge us on.

Starter

£19 a month

1 brand · 2 users · 380 credits a month

Or £160/yr. Everything above, plus live campaigns and AI work.

Growth

£49 a month

3 brands · 5 users · 980 credits a month

Or £412/yr. Several brands and the team around them.

AI work is charged in credits, so you pay for what you use instead of a seat you do not fill. A 15-second video is about £5.25; the shortest is £2.81. Work you do not run costs nothing. Cancel whenever you like and take your list with you.

AND IF YOU SEND SOMEBODY

You get paid for the introduction

Share your link. When somebody you introduced spends, you earn 0.5% of it — for as long as they stay.

Withdraw from £20. No follower count. No application. No tier to climb first.

DO THIS NEXT

Audit your website before you talk to us

Go to marketwaros.com/audit. Type your address. 31 checks against your real pages, your three worst problems in full, free.

Then decide whether the rest of this deck was worth reading.
